~~a plurality of waste threads~~ fibers consisting of pure cotton of a natural fiber
forming a web of a predetermined weight,

wherein a consistency and a rigidity of the web are provided by a purified water spray at high pressure and subsequent removal of moisture using high temperature,

wherein said ~~plurality of waste threads~~ comprises fibers ~~have~~ having a substantially uniform length, and

wherein said fibers are bound in a horizontal direction co-planar with a plane of the web and in a transversal direction perpendicular to the plane of the web.

15. (Currently Amended) The woven/non-woven fabric as claimed in claim 14, wherein said fibers comprise a length in a range of between about 8 mm to about 18 mm, and

wherein a weight of said web of fibers ~~waste threads~~ is not less than about 35 grams per square meter.

16. (Currently amended) The woven/non-woven fabric as claimed in claim 14, wherein said fibers ~~plurality of waste threads~~ comprise a by-product of a spinning process.

wherein said ~~plurality of waste threads~~ comprises fibers have ~~having~~ a
substantially uniform length, and

wherein said fibers are bound in a horizontal direction co-planar with a plane of
the web and in a transversal direction perpendicular to the plane of the web.

28. (Previously Presented) The woven/non-woven fabric as claimed in claim 14, wherein said web comprises a thickness in a range from 1 mm to 10 mm.
